Tropic, natural & sweet - organic coconut blossom sugar

Organic coconut blossom sugar is produced directly from the nectar of the coconut palm. In contrast to the usual household sugar, coconut blossom sugar is unrefined. This preserves the many valuable nutrients. The coconut blossom sugar tastes naturally sweet with a slight caramel note and is ideal for sweetening many dishes and drinks. Our organic coconut blossom sugar comes from controlled organic cultivation and is free from additives.

Delicious - SPELT-COCOA BISCUITS

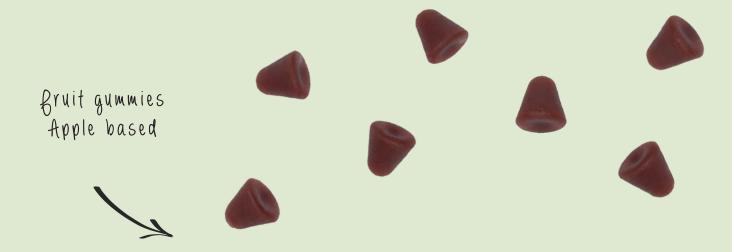

Our biscuits are handmade in our inhouse bakery. We always grind the wholemeal spelt fresh, which gives our biscuits their unforgettable taste. They are also not too sweet and are suitable for any occasion. Treat yourself to a little time out with our delicious spelt biscuits. Only in recent years has spelt been rediscovered as a high-quality, tasty and versatile original grain. Due to its high protein and fibre content as well as the high proportion of trace elements, spelt is often referred to as a regional superfood. In the past, spelt was the main cereal grown in our region.

Tasty-sweet FRUIT GUMMIES

Our vegan fruit gummies are a delicious alternative without gelatine. We use vegetable binders instead of animal gelatine. Apple pectin to be precise. A natural gelling agent obtained during the production of apple juice. 100% vegan and vegetarian.

The taste of our fruit gums comes from nature. Namely from thickened fruit juices such as strawberry juice or redcurrant juice. We do not use any artificial flavours or added sugar. In addition, our fruit gummies are completely fat-free.

ORGANIC COFFEE FROM COLOMBIA

Care, experience and our fair trade ensure the best quality for this coffee. Our green coffee comes from La Sierra Nevada de Santa Marta, a mountain range that is considered the highest coastal mountain range. The Arhuacos, one of the 4 indigenous groups, have always lived traditionally and cultivate coffee with a lot of manual work and close to nature.

Organic highlands COFFEE

This coffee has been traditionally picked wild in the jungle by the Indigo tribe for generations. This is how the coffee develops its special aroma compared to conventional "plantation cultivation".

With the help of our Colombian employee, we not only want to offer a special coffee, but also protect and promote the original tribe in Colombia.

Care, experience and our fair trade ensure the best coffee quality that you can taste. We roast this coffee ourselves in a drum in beech trees in Buchen. This allows the beans to develop their aroma fully and transform your coffee into a new experience of taste.
